## Minorities cope with Poly

Story by Maura Thurman  
Photos by David Middlecamp

On his first day at Cal Poly, Mark Iles decided to skip WOW activities with a couple of friends, and they took a walk downtown. A police car pulled up to them and two officers climbed out with a warning: "No street gangs in San Luis Obispo."

Mark Iles is black, a junior graphic communications major who is president of his fraternity, Omega Psi Phi.

"We were used to rowdy cops," he said. "We ran."

Iles said he has gotten used to the Cal Poly environment since he enrolled in 1978. But he and many minority students still say they feel most comfortable in their own living rooms.

"The administration doesn't recognize that there are any minority students on campus," Iles said. "They don't make any provisions for making them feel comfortable here at all."

The complaint is common among the university's 651 black and Chicano students. Although other groups feel more integrated into the campus mainstream, most ethnic students say they would like to see more minorities enroll.

Cal Poly's ethnic enrollment has increased slightly since September 1980, according to a study by CSU's Division of Institutional Research. The number of students who indicated an ethnic group on their Fall 1981 registration form rose to 1,660, a 1.1 percent increase to 12.6 percent.

### Poly lags behind

The division's systemwide study, however, showed

Cal Poly is still lagging behind other schools in minority enrollment.

Only two CSU campuses showed lower 1980 percentages than Cal Poly: Humboldt State reported ethnic enrollment of 7.8 percent, and Chico State reported 9 percent.

One reason for Cal Poly's low figures is the emphasis on technical majors like engineering and architecture, said Armando Pezo-Silva, director of the Educational Opportunity Program. Preparation for math and science programs is not available in the public schools attended by many minorities, he said.

Outreach programs which sent Cal Poly students to high schools to recruit minority students for the university were suspended for financial reasons, Pezo-Silva said.

The Student Affirmative Action program, which supervised outreach teams in the past, was merged

with EOP in September 1981. Pezo-Silva said a funding proposal for affirmative action is being drawn up with aid from a state planning grant.

The affirmative action program is becoming more important, Pezo-Silva said, because reductions in financial aid, enrollment and higher fees will discourage ethnic students from applying to universities.

Budget cuts have also forced a reduction in work-study positions, which are often filled by minority students. Pezo-Silva said several EOP staff positions have been frozen.

### Free market education

"We're almost moving back into the 1950s, saying to the students 'You can have higher education if you can pay for it,'" Pezo-Silva said.

The Educational Opportunity Program is not aimed exclusively at minorities. Nearly one quarter of its disadvantaged, or low-income, recruits are "non-Hispanic whites."

But Pezo-Silva said it is often ethnic students who have trouble adjusting to campus life.

"The goal of EOP and affirmative action is not only to get those students here, but to allow them to participate equally in society," he said. "We want these programs ultimately to self-destruct."

A basic step in integrating students is helping them succeed in school, Pezo-Silva said. Tutors are available in the EOP office, and computer printouts show a rise in GPAs as students advance in school.

## Snow storms rip South, East

(AP) — A Dixie snowstorm that left almost a million people without power Wednesday laid siege to the big cities of the Northwest as the death toll in the week's record cold wave reached 134.

Gov. George Busbee declared a state of emergency in Atlanta which was immobilized by half a foot of snow and ordered out 230 National Guardsmen to aid stranded motorists and help clear out thousands of abandoned cars.

The storm that had charged out of Texas swung up the Eastern Seaboard, closing schools in Washington, Baltimore, Philadelphia and the suburbs of New York City.

Up to 10 inches of snow was forecast in some areas around New York City.

In the West, snowdrifts to 40 feet high were hampering efforts to recover the bodies of two men from Billings, Mont., who were spotted Saturday from the air near the wreckage of their small plane atop 9,472-foot Mount Baldy in western Montana. Broadwater County Sheriff Rick Barthule led a six-man party up the mountain in snowmobiles Wednesday in the third attempt to retrieve the bodies.

## Promoter found guilty of fraud

LOS ANGELES (AP) — Sports promoter Harold Rossfields Smith was found guilty Wednesday of defrauding Wells Fargo Bank of \$21.3 million—the largest bank embezzlement in the nation's history.

Smith was convicted of 29 of 32 counts in his indictment, while co-defendant Sammie Marshall, a former bank officer, was found guilty on three of four counts. Both were found innocent of one count, and two counts were dropped. Both men remained free on bail pending sentencing March 9. U.S. District Judge Consuelo Marshall rejected a prosecution request that the two be kept in custody for fear they would flee.

"I lost faith in justice a long time ago," Smith, wearing a cowboy hat and blue jeans, told reporters outside court afterward. "It's been a long battle, and we had to fight it on a shoestring."

## Newsline

## Plane crashes into bridge, river

WASHINGTON (AP) — A Florida-bound jetliner with 73 people aboard crashed into a Potomac River bridge in heavy snow Wednesday, crushing automobiles and hurtling into the icy water. It was not known how many people were killed.

The Air Florida plane hit the bridge moments after takeoff from National Airport, which had been closed by the snowstorm periodically through the day.

It was a Boeing 737, carrying 68 passengers and a crew of five, Flight 90 bound for Tampa and Fort Lauderdale.

Sixteen survivors had arrived at two Washington hospitals by early evening, more than an hour after the crash. The plane went down shortly after 4 p.m.

The Department of Transportation said the plane was Air Florida Flight 90, from Washington to Tampa, Fla.

The snow stopped shortly after the crash, but the foul weather impeded rescue efforts. The temperature hovered in the 20's, wind whipped the river.

Police reported that the Boeing 737 crashed on takeoff from Washington National Airport, struck several cars, then plunged into the icy river. The capital was snarled by the snowstorm, and the information on casualties was sparse.

Jerome Lancaster, an Air Force sergeant who was in the traffic jam on the bridge at the time of the crash said "It looked like he lost his direction. The plane's wheel hit a truck."

"I counted about six or seven who were alive, but they were messed up," he said. "We threw a rope out to one passenger."

## Wide search for Thatcher's son

GAO, Mali (AP) — Military and civilian air and ground search teams scoured thousands of square miles of the Sahara on Wednesday for the 28-year-old son of British Prime Minister Margaret Thatcher.

Mark Thatcher disappeared five days ago during a grueling cross-country auto race through North Africa.

The racer's father, Denis, flew to Algiers to press the search for his son, and in London his mother broke down in tears during a speaking engagement.

Organizers of the Paris to Senegal motor rally said in Paris that a Swiss pilot reported seeing Thatcher's white Peugeot-Dangell on Monday in a rocky desert area of southern Algeria, but ground search teams found only tire tracks and were unable to determine their direction.

Organizers said soldiers and national police from Algeria and neighboring Mali joined the search Wednesday after race officials were unable to locate Thatcher, his co-driver Charlotte Verney of France and their mechanic Claude Garnier.

They said a Senegal-based French military plane, three smaller private planes, two helicopters, three desert trucks and a Land-Rover also were involved in the search, which included race officials and civilian volunteers.

## Abortion fee option approved

SACRAMENTO (AP) — Students who oppose abortion could withhold fees that help pay for abortion services at California public colleges under a bill approved by a Senate committee Wednesday.

The measure, SB1523 by Sen. John Doolittle, R-Sacramento, would apply to the University of California, the California State University and community colleges.

It would forbid any of those schools to exclude a student for refusing, for reasons of conscience, to pay any part of the school's fees that subsidized abortions, abortion counseling or abortion referrals provided by the school.

Computer Science & EE Graduates

## Explore NCR's world of San Diego opportunities

On-Campus Interviews:  
Thursday  
Jan. 21st

### The Challenges

You'll be involved in a broad range of stimulating software projects ranging from Interactive Operating Systems to System Architecture and High-level Languages.

You'll lend support to worldwide marketing organizations in the proposal and technical program management of complex systems for major customers.

### The Environment

You will be working in a state-of-the-art environment, centered around research, design and development challenges.

You'll live and work near the ideal setting of San Diego offering year-round outdoor recreational, cultural and

educational opportunities.

The Scripps Ranch facility is modern in design, with a stimulating atmosphere where high visibility and advancement go hand in hand.

Learn more by scheduling an ON CAMPUS INTERVIEW through your placement Office or by writing: Sharon Gordon, NCR Corporation, Dept. CPSLO, 9900 Old Grove Road, San Diego, CA 92131.

## Stanly Stoked

By Tony Cockrell

## Faculty group calls emergency plan 'unworkable'

BY TWYLA THOMAS

Staff Writer

Claiming that the county's nuclear emergency plan cannot measure up to what is necessary to protect the people of the area, a Cal Poly political science professor and the Concerned Cal Poly Faculty and Staff launched their protest of its expert conceptual approval by the Board of Supervisors this week.

At a press conference Wednesday, Richard Kranzendorf said, "Whether you're for or against, the plan is absolutely unworkable."

The group is concerned with what they consider to be three major flaws in the current plan: negligence of the problems caused by a radiological emission should an earthquake occur; the lack of protective actions if an emission occurs; and the absence of an operational

plan for Cal Poly.

Kranzendorf said the county plan doesn't include evacuation plans for Cal Poly, which has the largest, high-density population in the emergency zone.

"There's 17,000 people in that area (Cal Poly) from Monday to Friday, yet not one word has been written about what would happen," said Kranzendorf.

The current draft of the campus disaster preparedness plan, according to a group statement, has only one and one-half pages referring to Diablo Canyon, all of which is "couched in generalities." In addition, the county plan does not outline "such fundamental issues as the evacuation of the campus nor the types of actions required in the event of a mass sheltering on campus involving thousands of people."

The section of the Cal Poly Disaster Preparedness

Plan which refers to a potential Diablo Canyon accident lists the following guidelines: purpose, objectives, general information and the emergency warning system.

Under the warning implementation section, consisting of five sentences, the plan says sirens will be activated, instructions will be given to people on campus, shelter will be taken and a disaster plan (unspecified) will be implemented.

Finally, the plan concludes with: "The Cal Poly Disaster Director or his designee will ensure that all persons on campus receive notification as to what action, if necessary, to take for protection."

In a critique which reviews the county and campus emergency plans, the group contends that

## Baker: CSU budget becoming a 'maze'

BY NANCY LEWIS

Staff Writer

Gov. Edmund G. Brown Jr.'s shifting of state funds, and specifically California State University funds, has caused a "maze" for top administrative officials at Cal Poly to untangle, according to President Warren Baker.

Baker, speaking before the Academic Senate on Tuesday tried to "untangle a maze that is quickly happening" to the entire CSU budget. He also discussed the available space on campus for additional facilities.

"It is a move on a part of the government to shift funds around," he said, referring to Brown's changing decisions on how much to reduce the CSU budget.

Brown had originally proposed a 5 percent reduction of the 1982-83 CSU budget, said Baker. A CSU task force was set up to decide where this reduction would fall.

The result was a large increase in student fees to \$216, Baker said.

Brown then unveiled his

proposed state budget for 1982-83, cutting college budgets only 2½ percent instead of the proposed 5 percent, said Baker. Along with this, Brown limited student fees to an increase of \$55 instead of the CSU increase of \$216.

Baker explained to the Academic Senate that in light of Brown's decision, Cal Poly will have to make further program reductions because the \$55 increase per student doesn't make up the 2½ percent budget reduction.

"With the 2½ percent reduction, we're worse off now than with a 5 percent cut," Baker told the senators.

According to Baker, with the 5 percent reduction that Brown had originally proposed, student fees would have increased by \$216. But the \$216 would have made up for the 5 percent reduction, unlike the

situation now.

Baker also dealt with the issue of instructional facilities on campus.

He outlined the several projects that the capital outlay budget is supporting this year.

One project Baker discussed with the senators is the conversion of the Dexter Library to classrooms for the Art Department and for the School of Architecture and Environmental Design. This project is "high on the priority list" and should be completed in a few years, according to Baker.

Part of the project will be a program set up to relocate the activities now underway in the library.

Some provisions were made for space by "freezing up Jespersen Hall," he added.

This will be the last year for athletic housing on campus. The buildings will

be renovated and used as additional space for student services.

Space is also needed for an engineering laboratory facility and more offices, although these items were not included in the budget for this year, Baker told the senators.

"We were successful in achieving most of our goals for this year," in the capital outlay budget, said Baker.

According to Baker, space will be a tight problem on campus for the next few years until these facilities are built.

The Academic Senate, in other action, recessed until Jan. 19 when they will discuss the adoption of a resolution that calls for the establishment of a task force representing the entire university community to review the draft Disaster Preparedness

## Cal Grant recipients must pay fee raise

BY DEBRA KAYE  
Staff Writer

Cal Poly students on Cal Grants, financial aid provided by California Student Aid Commission, may be in for a rude awakening next Monday.

These students and the Financial Aid office, which acts as liaison for the commission, were originally told that the commission would pay the \$23 fee increase for the winter quarter, said Laura Dimmitt, a financial aid/Cal grant counselor. Later, the director found that the commission had changed its mind and was not going to pay the increase, but it was too late for them to notify students, because CAR had already started, she said.

However, the situation has been clearly stated for students next quarter, she said; from spring quarter on, they will be responsible for the difference between the annual fee grant of \$273 and the actual (current) annual fee cost of \$335.50.

The deadline for paying the \$23 increase is Friday, Jan. 15. After that, a \$5 late fee will be added and a hold put on the student's records, said Debbie Marple, a supervisor in accounts receivable.

Disenrollment, in which the student does not receive credit for classes and is not shown enrolled, was mentioned by the Financial Aid office as a possible action, but Marple said her instructions include only the late fee and hold so far.

Marple said she thinks "the majority" of Cal grant students knew about it. "Personally, I told probably 100 of them when they picked up their checks. I would just recommend, if they're not sure, to come and check with our office."

Mustang Daily—Vern Ahrendes

Biochemistry major Dan Bigley takes part in an experiment for a chemistry lab. Poly is facing cutbacks in such areas as instructor salaries and teaching supplies.

## Poly absorbs instructional budget cuts

BY RUSS SPENCER  
Staff Writer

Despite a recent cutback in money budgeted for Cal Poly's 1981-82 instructional expenses,

which includes instructor salaries and teaching materials, there have been no teacher layoffs or cutbacks so far, according to Academic Program

Specialist Frank Lebens.

The cutback took \$218,666 from the \$42 million instructional expenses budget, said Lebens. This has been absorbed by cutting back on operating expenses such as office supplies, lab chemicals and duplicating materials, he said.

"The cutback has not affected the number of classes we offer or in-class service to students," Lebens said. But he added that "if the budget cuts

were to continue, it would have a big effect on direct service to students."

"It would be very frightening if these cuts were to happen year after year," Lebens said. "It would definitely take its toll on instruction services sooner or later."

The October cutback was ordered by California State University system Chancellor Glen Dumke, after Gov. Edmund G. Brown, Jr. announced that

## MAI's Basic Four Engineers Create time Machines

If you've distinguished yourself in your college career, we think you should know about MAI's Basic Four Information Systems Division. From the beginning, the purpose of Basic Four engineers has been to bring the small business into the modern age, to dramatically close the gap between where small companies are in the business world and where they could be.

With the creation of this "time machine" technology in mind, we built the first computers specifically tailored to small businesses, and have been revolutionizing small company management and effectiveness ever since.

Basic Four takes the most complex information systems and makes them easy to use and easily accessible to extending computer capability, reliability, and quality, and combining state-of-the-art hardware with flexible, powerful, easy-to-use software packages. The result has been an entirely new posture for the small company in the international business community, with a broad increase in small business efficiency and profitability.

If you're a college senior, look into a remarkable career at MAI's Basic Four Information Systems Division. You'll enjoy an outstanding salary and benefits package, a beautiful Southern California location, with immediate access to an exciting range of recreational and cultural riches, and you'll involve your skills in some of the most intriguing challenges in your field, playing a key role in helping to pace the world of business.

Don't begin your career at a standstill. Put it into a time machine at Basic Four.

## Computer Science & Electrical Engineering Majors ...

ROLM, with locations in the San Francisco Bay Area and Austin, Texas seeks talented individuals interested in:

### SOFTWARE

- Real-Time Distributed Computing
- Operating Systems
- Data Base Management Systems
- Data Communications
- Diagnostics
- Electronic Mail
- Software Tools: Compilers, Debuggers, etc.
- Test Engineering

### HARDWARE

- Data Communications
- Digital and Analog Design
- Microprocessor Applications
- Telephony
- Production Engineering
- Test Engineering

ROLM Corporation, founded in 1969 has grown 50% - 100% each year and currently has 4400 employees. ROLM is the leading independent supplier of computer controlled voice and data business communications systems.

Included in ROLM's outstanding benefits package is a three month paid sabbatical after six years (and every seven years thereafter), Company Paid Tuition for graduate study at Stanford and other area universities. Employees can take advantage of flexible working hours to use ROLM's million dollar recreational facility which includes tennis courts, racquetball courts, basketball, exercise room, volleyball, swimming pools, par course, sauna, steam room and jacuzzi.

## On Campus Interviews

TUESDAY, Jan 26 & Wednesday, Jan 27

Meet with working Software and Hardware Engineers from ROLM in the Placement Center. See our Company Literature in the Placement Center.

If unable to attend an interview, send resume to: Gibson Anderson, Manager, Recruiting & Training, ROLM Corporation, 4900 Old Ironsides Drive, M/S 560, Santa Clara, CA 95050. We are an equal opportunity/affirmative action employer.

**ROLM**

CORPORATION

# For minorities, there's life beyond the mainstream

From page 1

A second step is the breakdown of stereotypes surrounding different ethnic groups.

"Stereotypes aren't dissolving in the classroom," said Pezo-Silva. "The university should provide an environment where students can interact, where they can train one-on-one in human differences."

Most of California's residents will have non-white origins by the year 2000, Pezo-Silva said, and Cal Poly should prepare for and reflect that change.

"I won't say we've achieved anything yet," Pezo-Silva said. "The majority of ethnic students who drop out leave because it isn't a place where they can feel comfortable."

Daniel Rios, president of the Chicano group MECHA, agreed.

"It's not the grades, it's the culture," he said. "Chicanos come here, we see the restaurants, the town, the concerts—we're lost."

Groups like MECHA are especially important, Rios said, because San Luis Obispo is geographically isolated from urban ethnic communities.

## Support needed

"We need support from one another," Rios said. "Names and colors will never change, so why do people think you can forget your culture?"

In addition to personal contacts, campus ethnic groups may also lobby for tenure or promotion of minority instructors or similar "role models." Rios said students receive emotional support

when they encounter situations like discrimination in housing. More specific clubs like Latinos in Agriculture or the Society of Hispanic Professional Engineers offer academic encouragement.

Rios said he is pleased with the new Multi-Cultural Center, which will open Friday.

"Students need this, to learn about

one another," he said. "Lots of them graduate and go to work in big cities with no understanding of the cultures there."

Building confidence in one's own culture is another goal of campus ethnic groups, said Dave Tucker, president of the black fraternity Alpha Phi Alpha.

"Lots of black students come to school here and won't associate with us," Tucker said. "They feel they have to fit in with the white race. They feel uncomfortable and start to lose their identity."

## Break down the barriers

Cal Poly's two black fraternities and two sororities have joined the campuswide Interfraternity Council, partly in an effort to "break down the barriers."

Omega Psi Phi president Mark Iles said the organizations he and Tucker lead are culturally different from other campus fraternities. Special activities include visits with CMC inmates and competitive marching.

All black fraternities have "stomp teams," Iles explained. Similar to drill teams, the groups create and practice entertaining routines, and compete with other fraternities. In June 1981, Cal Poly's Omega Psi Phi chapter won the district title in Las Vegas.

"Other frats think it's some sort of a hazing thing," Tucker said. "They think it's humiliating to perform in front of people like that. It's just different, that's all."

Minority cultures are rarely mentioned in the classroom, Iles said, which increases feelings of alienation among

ethnic students.

"In my first history class, we went the whole nine weeks without saying the word 'black,' or 'Mexican,' either," he said. "We're being miseducated because the curriculum isn't multi-cultural."

Ethnic diversity is needed in campus entertainment and social events, Tucker said. Few minority speakers or black musicians appear on campus, he said, and those that do get little publicity. He cited the upcoming Count Basie Orchestra concert as a badly publicized event.

Concert Committee Chairman Craig Waldman said ASI strives for variety in its programming, but cultural events attract small audiences.

"Santana turned out fairly well," he said. "But the Crusaders concert fell on its face a couple of years ago, and they're a fantastic jazz group. When they don't make money, it tells you something about preferences."

Gail Hannigan, who heads the ASI Finance Committee, said similar problems arise when funds are being allocated to ethnic groups.

Five groups appear on ASI's 1981-82 priority-funding list: the African Students Union, Pilipino Cultural Exchange, Muslim Students Association, MECHA, and the United Black Students Awareness Council.

"We're almost moving back into the 1950s, saying to the students 'You can have higher education if you can pay for it.'"

—Armando Pezo-Silva

Tutor Nelson Smith helps Poly student Garry Thomas with accounting studies in the EOP office.

"ASI doesn't seem to understand that we're promoting cultural awareness for the whole campus."

—Ed Sapigao

"ASI doesn't seem to understand that we're promoting cultural awareness for the whole campus," said Ed Sapigao of the Pilipino Cultural Exchange. "They want us to make money, which is very difficult."

Hannigan said the "middle class background" of most Poly students makes it hard to support cultural events.

"Lots of the programs are no-shows," she said. "We're hoping the Multi-Cultural Center will bridge the gap."

One of the oldest ethnic groups on campus is the Chinese Students Association, which was founded by the Louis family, owners of the Ah Louis store on Palm Street. With 47 members, it is one of Cal Poly's larger groups as well.

The Chinese New Year banquet and show scheduled for Jan. 29 at the Veteran's Memorial Building will be the group's 25th annual production. The show sells out every year, said Dewitt Mark, the group's president.

"I think people are interested in other cultures," he said. "I'm not sure you can force it on people."

Chinese students fit in easily at Cal Poly, the architecture student said, because their culture emphasizes "studiousness." But he said responsibility for cultural acceptance begins with individual attitudes.

"The way I look at it, we're all one people, no matter what our background or color is," Mark said. "Everybody has to do their part."

## Chinese specialists to visit

BY STEPHANIE WINN  
Staff Writer

Agricultural specialists from the People's Republic of China will tour Cal Poly's School of Agriculture and Natural Resources Jan. 14 through 16 in order to pick up on the school's educational techniques.

The six representatives, headed by He Jiadong, chief of the Education Division, Science and Education Bureau of the Chinese Agricultural Commission, chose to visit Cal Poly because of its reputation as an agricultural institution, said Kip Ratty, agricultural information director at Cal Poly.

"Cal Poly's reputation is internationally known," said Ratty.

John West, assistant dean of the School of Agriculture and Natural Resources, will serve as host to the group. The visit was arranged through the World Bank of China project in cooperation with the Consortium for International Cooperation in Higher Education headquartered in Washington D.C.

During their visit, the Chinese will tour the Agricultural Engineering facilities and farm shops, visit the Crop Science Department field units and meet with department heads of the school along with representatives of Cal Poly's Vocational Education Productions.

The group will also be the guests of Dr. Lark P. Carter, dean of the School of Agriculture and Natural Resources, at a luncheon at Vista Grande restaurant.

In addition to Jiadong, a specialist in animal husbandry, other members of the Chinese delegation and their specialties include Liu Bingchen, equipment for agricultural education; Li Shizhao, organic chemistry; Xue Jiahua, physical chemistry; Wang Baoshen, representing the Chinese Ministry of Agriculture; and Din Shusheng, representing the State Machinery Commission. Holly Downen, an American, is escorting the group and serving as interpreter.

The visit, said Ratty, is only one of many such projects that Cal Poly has been involved with.

## Faculty group protests plan

From page 3

"...the two plans do not ensure minimal protection and are simply devices to fulfill local, state and/or federal requirements

rather than being serious efforts at constructing a workable plan which would be implemented in an emergency."

The group's opposition of the draft emergency

preparedness plan, developed for residents within a 20-mile radius of the Diablo Canyon Nuclear Power Plant, is based on data that shows evacuation for most of the 100,000 people in the emergency zone is impossible.

According to their news release, "Distance from Diablo Canyon, wind direction, wind velocity, and minimum time needed to evacuate the population combine to show that under optimal conditions, between 28 percent and 68 percent of the citizens in different towns and cities cannot be evacuated should the need arise."

Even though the Board of Supervisors was expected to give their approval to the county plan, Cal Poly Biology Professor Richard Krejsa said four or five speakers from the group would be present at the public meeting with the board Wednesday night to present testimony and register protest.

If the Nuclear Regulatory Commission interprets the board's actions as tacit approval of Diablo Canyon and okays a full power license for the plant, Krejsa said the group "can't do anything about that."

If Diablo does get a full-power license, however, Krejsa predicts another blockade.

"There are 1,800 people not afraid to go back to jail...it will be easier the second time around," said Krejsa.

## Poly reacting to budget cuts

From page 4

2 percent would have to be cut from the system's 1981-82 fiscal year budget.

The toughest part of dealing with the budget cut Lebens said, was altering the budget in October, five months after it had originally been planned.

"We had already sent out purchase orders and everything when we found out about the cutback," he said.

When Lebens got word of the budget cut, he said he "went out and asked the deans of all seven schools to try and find places to cut back." He said that all of the deans returned with enough operating expense cutbacks to prevent any actual teacher layoffs or cutbacks.

"No one school had to give up a lot," Lebens said, "but you don't just give up things and not notice some effect. The cutbacks probably aren't obvious to students, but it's necessary for them to start being prudent."

## Senator seeks two nominations

SACRAMENTO (AP) — State Sen. John Schmitz, claiming an "overwhelming positive" public reaction to his name-calling attack on abortion rights advocates, said Wednesday he'll seek both the Democratic and Republican nominations for the U.S. Senate.

The Orange County Republican, one of eight candidates for the GOP nomination, said he would also run as a write-in candidate in the Democratic primary.

He said he is confident he can win the Republican nomination, and he has an outside chance of becoming the Democratic candidate as well.

"...I believe that people who believe as I do constitute a great hidden bulk in the Democratic Party that is waiting to rise up," said Schmitz.

"I see this as the first step in bringing together the strongest strands in the national fabric in order to gird ourselves for the potentially apocalyptic times that lie immediately ahead for our country," he said.

## Join the Class of '81—at Hewlett-Packard

### Take a look at why these Cal Poly grads chose HP

#### Kyle Karnosh Rosenbloom

BSEL June '81  
Development Engineer  
Stanford Park Division  
Palo Alto, CA

"There are many companies which offer interesting and challenging jobs, but I think it was the working environment at HP that made me decide to come to HP. The atmosphere is very relaxed and open, which makes it easy to learn from experienced people in the lab. The emphasis is where it should be; the important thing is doing your job, not what you wear to work or physically being at your bench from 9 to 5. I guess what I like about HP is its common sense philosophy; if you treat people well, they'll do a better job."

#### Kevin Bockman

BSME June '81  
Development Engineer  
San Diego Division  
San Diego, CA

"As an HP Development Engineer, I'm constantly on the move to solve new and exciting challenges, and opportunities for fulfillment as an engineer. You are given as much responsibility as you can handle with your contributions having a real effect on the new product design. HP gives me a chance to utilize my creativity and strive to attain my full potential. At HP, new engineers can immediately get involved with state-of-the-art design for new products which will have a great impact on people's lives today and tomorrow."

#### Jeannie Campbell Bruins

BSCS June '81  
Marketing Engineer  
Computer Support Division  
Cupertino, CA

"After four years in the Computer Science program I never thought I'd get a job in Marketing. During my interview with HP I was told how I would be able to apply my computer background in an area other than programming. They were right! I'm currently a Support Engineer working closely with both our Field and Factory to determine the best way to support new and existing software products. I'm not designing new software, but using my knowledge of software to design and develop new support strategies."

#### Dean Adams

BSET/EL Dec. '81  
Customer Engineer  
Neely Sales Region  
Palo Alto, CA

"From the time I began working for HP, I've enjoyed the training that's provided for Customer Engineers. I've made friends from all over the world. As a Customer Engineer, I enjoy working with professional and well trained people. My job as Customer Engineer takes me to many different companies where I service and repair Hewlett-Packard's commercial computer systems. I'm on the go and learning all the time. With HP growing and changing as fast as it is, it's a fun place to be."

THERE ARE MANY GOOD REASONS FOR CONSIDERING HP INCLUDING: REPUTATION. An opportunity to work for a company highly regarded for the way it relates to people, as well as for its products for science, engineering, medicine and business.

A VARIETY OF OPPORTUNITIES in Research and Development, Field Sales, Manufacturing, Marketing, Administration or Service. We've grown to more than 200 offices and plants around the world.

A CHANCE TO CONTRIBUTE TO HP'S SUCCESS in an environment where new ideas are actively sought out, as well as sharing in that success through a profit sharing program and excellent pay and benefits.

If these sound like good reasons to you, we'd like to talk to you while we're on campus. We'll be interviewing on January 27 & 28.

Check with the Placement Center for more information and sign-ups.

# Student advisor outlines means of rape defense

BY LORI MARLETT

Staff Writer

"San Luis Obispo County has the highest rate per capita of reported sexual assaults in any community in the United States," said Craig Ross, security adviser at Cuesta College.

The county also has one of the highest conviction rates, according to Ross who spoke at the Child Development Club meeting Tuesday night in Agriculture 214. Ross said the high conviction rates were a result of reduced publicity during the investigations of sexual assault crimes.

Bette Tryon, a child development professor, commented, "This could be hurting the public. Lack of publicity concerning sexual assaults gives citizens a false feeling of safety and security."

Rapes against females and even incidences against males have increased drastically over the years, said Ross.

Ross spoke of his dedication to rape prevention which stems from a personal tragedy that occurred in his life a few years ago. Offering his time to clubs and organizations, Ross has tips and techniques to help out in dangerous situations.

"One approach is to do nothing and you will be assured that you will get raped—he's not going to stop," said Ross. If you decide to do something in defense then "go all the way," suggested Ross.

Ross graphically depicted ways a woman could deliver a crippling or fatal blow to her assailant. The most effective areas to

A pair of Poly women entering Poly Canyon heed a sign reading: "Warning A rape occurred in this area. Until further notice do not enter alone the Stenner Creek and Poly Canyon areas."

inflict bodily harm are from the chest up, including the eyes, ears, nose or throat, said Ross. Remember to take action in the first 30 seconds, he said. This puts the element of surprise on your side.

Many times attackers are scared off by signs of aggression, said Ross.

"Contrary to popular belief the groin area is not the best place to injure your attacker," said Ross, "it would take a very high kick to make contact. Since it is such a small target area, if you miss you will most likely be caught off-balance and easily forced to the ground."

Should one carry a weapon as a safeguard against sexual assaults? Not according to Ross, because more than likely a

weapon will be used against you.

One weapon that Ross does advocate is mace—a chemical nerve agent commonly called tear gas. California law requires a permit to carry mace.

When mace begins to work in three-tenths of a

second the eyes will begin to water and sting causing them to shut tight. In three seconds the victim begins to wheeze and gasp for air and in five seconds a loss of bodily control occurs, according to Ross who has experienced the tear gas.

These techniques could help during an assault and Ross also offers a tip to prevent the situation from ever occurring.

"Be aware of your natural surroundings (where you are, where you are going, what you are doing) and show it," sug-

gested Ross.

The question he most frequently gets regarding rape is how long is a victim affected? He answers by reading the words of a seventeen-year-old who was raped when she was fourteen:

*I have killed you a thousand times inside.  
I have gotten my revenge safely.  
I have seen the good in people,  
and the bad,  
but I can see no good in you.  
There are animals that are more human than you.  
Have you once thought back and regretted a thing?  
Probably not.  
I have killed you a thousand times inside.  
But you haven't died in my mind.  
It is a fine scar you have left on me; inside and out.  
I have killed you a thousand times inside.  
Please die.*

## Clinical testing on drug cut short by U.S. government

WASHINGTON (AP) — A government agency has cut short the clinical trial of a promising heart drug, reportedly because it proved so effective that doctors felt they could not delay its availability to other patients.

The National Heart, Lung and Blood Institute said it will reveal Thursday the findings and implications of its study of propranolol, a so-called beta blocker drug. A spokesman, York Onnen, confirmed Wednesday the results are "good news."

The three-year, \$22-million clinical trial was undertaken to determine if propranolol could help the 850,000

Americans who suffer heart attacks each year to avoid a fatal recurrence.

The drug is currently prescribed for hypertension and angina pectoris, the chest pain associated with coronary heart disease. The Food and Drug Administration would have to approve any new use.

Institute officials acknowledged Wednesday they had accepted an advisory group's recommendation to curtail the study and announce the results. They refused to amplify. A scientific article on the results will be published next week in the Journal of the American Medical Association.

## HEALTH CARD

Last day to buy your Winter Quarter Health Card January 25, 1982

Health Cards are now available at \$23/quarter at the Health Center Cashier - University Cashier

**Queen Contest**

Applications for Poly Royal Queen are now available in U.U. Room 214. They are due Jan. 21 at 3 p.m. For more information, call Sandy Schultz at 543-1587.

**James Bond Movies**

The James Bond movies "Goldfinger" and "Thunderball" will be shown in Chumash Auditorium tonight at 7 and 9:15, respectively. Cost for the double feature is \$1.50.

**Engineers' Meeting**

The Environmental Sciences and Engineering Club will meet today at 11 a.m. in Air Conditioning Room 110. The meeting is to plan activities and tours for winter quarter involving areas of air and water pollution.

**Lacrosse Practice**

The Cal Poly Lacrosse Club will hold a practice Friday at 3 p.m. on the field below the main track. Everyone interested in playing lacrosse is invited. Experience is not necessary.

**Bike Ride**

On Saturday, the Poly Wheelmen will hold a leisurely ride to Avila beach for breakfast at the Customs House. Everyone is welcome. The ride will begin at 9 a.m. in front of the main gym.

**Design a T-shirt**

The Engineering and Technology Council is sponsoring a t-shirt design contest for the School of Engineering and Technology. The winning designer gets \$25. The design should be one color.

# Poly Notes

Designs should be submitted to Box 35 in the Activities Planning Center or at the council meeting in U.U. Room 220 at 5 p.m. Jan. 20.

**Intramural Racquetball**

The deadline to sign up for intramural racquetball doubles has been extended to Friday, Jan. 22. Sign up in the Intramurals Office in U.U. Room 104.

**PACE Meeting**

PACE, the Poly Association of Consumer Economics, will meet Feb. 3 from 6 to 7 p.m. in the

Home Economics building. There will be a guest speaker, Harriet Lyons, from Cooperative Extension.

**Foresters Meeting**

The first meeting of the quarter for the Society of American Foresters will be held today at 11 a.m. in Science B-5. The Mt. Figuerora thinning project and the logging team will both be discussed.

**SAM Get-Together**

The Society for Advancement of Management will be sponsoring a bowling

pizza feed this Saturday. Bowling begins at 4 p.m. in the U.U., followed by a Pizza feed at Bechelli's at 7 p.m. The activity is free for all members, with a \$2 charge for non-members. There is also a meeting today at 11 a.m. in Ag Engineering 123.

**"Cross It Up"**

The Cal Poly sports Car Club is sponsoring an autocross Sunday, Jan. 17 in the baseball diamond parking lot at 8 a.m. This is a slalom event, where cars are timed as they run through the course. There is a \$4 entry fee, and trophies will be awarded.

**"War Game" Movie**

The Campus Hunger Coalition is sponsoring the movie, "The War Game" tonight at 7 p.m. at Pacheco School, 165 Grand

Ave. San Luis Obispo. The movie discusses current turmoil in Europe and the talk of limited nuclear war.

**Mathematics Career**

Kappa Mu Epsilon, the mathematics honor society, will hold a career day Jan. 28 from 11 a.m. to 1 p.m. in Math, Room 114. Representatives from 12 companies will be present to discuss career opportunities for math, computer science and statistics majors.

**Logging Team Meeting**

There will be an explanatory and introductory meeting for everyone interested in joining the Cal Poly logging team Friday at 7:30 p.m. For more information on the location of the meeting, attend the S.A.F. meeting today in Science B-5 at 11 p.m.

## MUSTANG—YOUR DAILY PICKUP

## Work-study employs students

BY MARY KELLY  
Staff Writer

The Work-Study Program designed to give students an opportunity to work and earn money in their field of study is looking for students to enter the program, according to Steve Gallardo, a Counselor and Work-Study Coordinator.

The purpose of the Work-Study Program is to give students who need a part-time income the opportunity to work. The program has contracts with 90 departments on campus, and 35 organizations off-campus participate in the program.

Gallardo said work-study is an ideal opportunity for students to gain experience in their field of study by working as a student assistant, or assisting with a research project. The final job choice is left up to the student.

The program generates jobs on campus that would otherwise, not be available, he said. Normally, student assistants are paid by the department, which receives its funds from the state. Under the Work-Study Program, the federal government pays 80 percent of

the student's salary, while the department is only responsible for 20 percent of the salary, Gallardo said.

To qualify for the program, students must apply for financial aid. Through the application, it will be determined if the student is eligible for work-study.

To remain eligible once work-study has been awarded, an undergraduate must satisfactorily complete 12 units a quarter, and graduate students must complete 8 units a quarter, according to Gallardo.

Under the program, students can only work 20 hours per week while classes are in session. However, a student may work a 40 hour week during school vacations with authorization from the Financial Aid Office.

"I support student employment 100 percent," said Gallardo, "and I believe that an individual is better off if they work during their college experience, but essentially what the student is receiving is some practical experience."

Applications for the Work-Study Program may be picked up in the Financial Aid Office, Room 128, in the Administration Building.

## New CSU budget a maze, says Baker

From page 3

Plan and present its findings to Baker. They will also discuss whether they will urge Baker not to implement the plan in its current form.

The Disaster Preparedness Plan is a plan drawn up in the fall by a committee formed by Baker. This plan would direct campus services and the campus population in response to peacetime emergencies.

The existence and design of such a plan has become essential given the tentative completion and operation of the Diablo Canyon Nuclear Power Plant, states the proposed resolution.

Jim Simmons, English professor, said the plan "was unsatisfactory in every possible way," because neither students nor faculty were included among the 10 people selected to help draw up

the plan, nor were they consulted on the plan while it was being drafted.

In addition, Simmons said, the publicity of the drafted plan has been so poor that few on campus are even aware of its existence.

The proposed resolution also states that the Academic Senate considers both the procedural and substantive aspects of the present draft are deficient, and shouldn't be considered an optional plan.

Due to space limitations, the Jan. 13 page 1 story "Observer: disarmament far from reality" left off the address Cal Poly women should write to if they wish to apply for the Ann Peabody Brown In-

ternship. Interested women should write to: Ann Peabody Brown Internship, in care of Mid-Peninsula Conversion Project, 867 West Dana Mountain View, CA 94041.

# Wrestlers bow to Bakersfield, 20-18

BY TOM CONLON  
Sports Editor

Cal Poly's dominance over California collegiate wrestling suffered its second blow in as many seasons Tuesday night as Division II bully, Cal State Bakersfield roughed up the Mustangs, 20-18.

The Roadrunners, who have won six of the last seven NCAA Division II national championships, made themselves at home in the unfriendly confines of the Cal Poly Main Gym. Supported by a sizable and vocal rooting section, the Roadrunners led 8-0 after the first two bouts and never relinquished the lead. Although 158-pounder Louie Montano pulled the Mustangs within three points, 11-14, by pinning Woody Smith with 1:29 left in the first period of their bout, Mustang fans had little else to get excited about, as the Roadrunners won decisions in six out of the 10 weight classes.

In the 118-pound class, Al Gutierrez

dropped his fourth decision of the season against six wins. Wrestling the Roadrunners' defending Division II champion, Adam Cuestas, Gutierrez lost on a two-point take down with 20 seconds left in the bout—final score: 8-6.

Sophomore Sean Shea was the next Mustang to fall to the mighty might of Bakersfield's lower weight classes. Defending national champion in both divisions at 126 pounds, Dan Cuestas (Adam's older brother) did everything but pin Shea, coming close with four near falls, to win 21-1.

In one of the most active bouts of the match, Poly's 134-pounder Mike Barfuss put five Mustang team points on the board with a 19-3 thrashing of Roadrunner Charles Cheney.

Chris Cain had a chance to tie things up for the Mustangs at this point with a decision. But 142-pounder proved to be just one of several disappointments for the Mustangs as Bakersfield's Steve Nickell won 6-5 with a one-point escape

in the final seconds of the bout. It was the first defeat of the season for Cain who now sports a 3-1 record.

In probably the most crucial bout of the night, the 150 pound class, Pat O'Donnell continued the Mustangs' misfortunes, losing to Craig Noble, 8-6. With the clock running down in the final period and O'Donnell holding a one-point lead, the Mustang junior was called for a foot fault in a standing start, which tied the bout. Noble made the referee's call academic with a two-point take down seconds later.

Montano's pin may have put the Mustangs back in the match and brought the home crowd to their feet, but Roadrunner fans could take solace in knowing that Smith was a replacement for an injured Perry Shea—a defending national champion.

Mustangs Dario Slavazza and Dale Ambler lost the next two bouts in the 167 and 177 pound classes, giving Bakersfield a 20-11 lead. And when Joe Elinsky failed to pin Mitch Babcock at 190 pounds Poly's fate was all but sealed.

Heavyweight Josh Washington need-

ed to pin Rogelio Herrer for a Mustang victory, but the 276-pounder Herrera proved to be too much weight to turn over as Washington won the battle, 8-3, while Poly lost the war.

The Mustang matmen's only other dual-meet loss to a California team in the 19 years of coach Vaughn Hitchcock's reign came against San Jose State last season. Poly's dual meet record now stands at 3-4.

Former Poly standout named Minor League Player of the Year

By VERN AHRENDES  
Staff Writer

Eric Peyton will be debuting on the banquet circuit, of sorts, and it could prove to be a very humble beginning for the former Cal Poly baseball player.

Peyton and Poly coach Berdy Harr will travel to the Bay Area on Jan. 25 as the former Poly star will be named the Northern California Baseball Writer's Association's Minor League Player of the Year.

Peyton is just another on the growing list of Harr proteges who have made the successful step from the college ranks to the major leagues.

Peyton, who is a new arrival in the Milwaukee Brewers organization, blasted holes in the pitching he saw last summer while playing for the Pioneer League champion Butte, a rookie league team in Montana.

The outfield slugger led Butte in eight of 11 offensive categories including his team high .403 batting average which was the highest average posted in the entire minor league rookie classification.

He also slammed 10 home runs, "dingers" as he calls them, and drove in 67 runs. Another big number that he had was 25 stolen bases in 27 attempts which is not bad considering that he was hitting in the No. 3 spot in the batting order. Coaches usually drool over those numbers, especially when they are coming from a No. 3 hitter. For an official response, check with Harr.

In the back of his mind, of course, is a pro contract and a spot on one of the pro rosters along with Poly grads Ozzie Smith and Mike Krukow. Peyton is expecting a hiatus of at least two years before he can be wearing the Brews blue and gold but he

credits George Bamberger (the current New York Mets head man) for cutting a big chunk off of that wait.

It seems that Bamberger was the one (while he was still with the Brewers organization last summer) who suggested moving Peyton from left to center field. That move will probably figure to be one of the most important moves in his blossoming career.

There are enough prospects in the Brewer organization fighting for the left field spot with the big club to fill a small phone book, but there is only one center fielder with promise ahead of Peyton.

"Moving me to center was the best thing that could have happened to me," he said while lounging on a bench next to the Poly baseball field. "The guy ahead of me is a slugger

and has a lot of power but there are not many like me who can hit dingers and can run."

One big test for Peyton will come this March when he reports to Phoenix with the rest of the organization for spring training. He hopes to land a spot with the Brewer's farm team in Stockton. The jump could mean a pay increase of possibly \$2,000.

One other factor that might speed Peyton's way to the big club was the announcement the Brewers made saying that last year's center fielder, Paul Molitor, was being moved to third base.

Some other baseball notes of interest include Tom Beyer's success in the Los Angeles Dodger organization. The former Poly standout has hit over .300 the last two seasons.

He is expected to move

from Double-A club in San Antonio to the Triple-A club at Albuquerque.

Bill White, Berdy Harr's starting third baseman last season, has been granted a tryout with the San Francisco Giants sometime in the next few weeks.

After a perfect 4-0 start last week, I am afraid that I will not have as much luck with this weekend's picks. San Diego Chargers. I just thought I would mention the Chargers to calm the "concerned student" that called last week.

My instincts say to pick Northridge by five but then there is the intangible home court advantage, if there is any. Simply put, Ernie Wheeler's Mustangs will not win the conference title if they lose Friday to Northridge. They know that and so does Northridge.

## Mayors bet on Super Bowl

CINCINNATI (AP) — Mayor David Mann has accepted San Francisco Mayor Dianne Feinstein's Super Bowl wager of regional food and drink, based on the outcome of Super Bowl XVI between Cincinnati Bengals and the San Francisco 49ers on Jan. 24 at the Silverdome in Pontiac, Mich.

Mann agreed to an unspecified pledge to the fund, but also put in a plug for some Cincinnati products by betting a case of beer—half of which would come from each of Cincinnati's two breweries—a sampling of produce from the city's historic Findlay Market, a "surprise" entree from the Maisonette restaurant's five-star kitchen, and a locally made ice cream.

The margin of victory doesn't matter in the wager.

AEROBICS 3 MONTH

Tone up your body to feel good and look great. Maloney's exercise specialist, Marcy Maloney, instructs aerobic classes daily.

Marcy uses a variety of exercises to keep classes interesting. Stretch, warm-up, set your heart pumping, and cool down with exercises to music. Don't let another day go by; join us at Maloney's.

At Maloneys Gym & Fitness Center we recognized the need for a separate aerobics and gym facility just for women. We have just doubled the size of our gym and our programs offering classes hourly, ranging from novice to intermediate exercise. Call us for details!

3546 S. Higuera, Suite 190 San Luis Obispo, CA 93401 541-5180

## Wrong response

"Only in the most severe national emergency does the government give a claim to the mandatory service of its young people. In any other time, a draft or draft registration destroys the very values that our society is committed to defending."  
...Presidential candidate Ronald Reagan in a letter to Congress, February 1980.

After diligently opposing its reenactment during the 1980 campaign, President Reagan has now decided to listen to the advice of administration officials and indefinitely continue standby draft registration.

Although Reagan continues to oppose draft registration in principle, he has still changed his position, based largely on the arguments put forth by Secretary of State Alexander M. Haig Jr. and Secretary of Defense Caspar W. Weinberger.

Both officials theorized that an end to draft registration would show a lack of purpose and consistency in America's dealings with the Soviet Union.

However, the *Mustang Daily* Editorial Board feels the president would have done well to listen to his own past words.

As Reagan said himself, the concept of draft registration runs directly counter to the values that have made the United States probably the freest society on earth.

It is also sadly ironic that this loss of freedom by young American men should be part of our response to the losses of freedom suffered first by the people of Afghanistan and most recently, Poland.

Perhaps the most tragic aspect of draft registration is the simple fact that it will do little, if anything to solve the serious man power problems facing the United States armed forces. *Quantity* of personnel is not so much a problem facing the military as is the *quality* of them. Over the last two years, for instance, the Pentagon has recruited some 99 percent of the personnel it says it needs to be prepared for war.

Draft registration does nothing to help the military retain the experienced commissioned and non-commissioned officers who are leaving the service by the thousands to take up more lucrative civilian jobs. It is these individuals who are the backbone of the armed forces, as they possess the technical skills and know-how necessary to run the modern military machine. Their services can be retained only when the military provides them with pay and benefits comparable to those offered in civilian jobs.

Registration has also done nothing to solve other problems which beset the military, such as a high desertion rate and a serious imbalance of high school drop-outs. Again, improvements in pay and living conditions are the key to dealing effectively with these problems.

However, a continuation of draft registration will not create a stronger military, and the Soviet Union is aware of that. Draft registration also mitigates against the democratic principles President Reagan himself spoke of.

The United States can turn to more democratic means to create efficient military. And without draft registration, President Reagan just may find he sleeps a little sounder at night.

## Daily policy

Letters and press releases may be submitted to the *Mustang Daily* by bringing them to the *Daily* office in Room 226 of the Graphic Arts building, or by sending them to: Editor, *Mustang Daily*, GrC 226, Cal Poly, San Luis Obispo, CA 93407. Letters must be typed and include writers' signature and phone

number.

Editors reserve the right to edit letters for length and style, and to omit libelous statements. Letters should be kept as short as possible.

The *Mustang Daily* encourages readers' opinions, criticisms and comments on news stories and editorials.

Hmmm. The Europeans are supporting our position on Poland and Russia! When's the last time the NATO countries stood behind the President?

When's the last time the 'niners went to the superbowl?

Both must be flukes.

### Hang the felons

Editor:

With regard to "Small request" (Opinion, Jan. 12), you're crazy if you think the people of this country will allow their hand guns to be taken away; and crazier to think gun control will solve any problems. It just doesn't work that way.

The dream many ignorant liberals see is that by making another law, one banning handguns, violent crimes would be drastically reduced. Right! While they're at it why don't they outlaw PCP, pot, LSD and speed; then no one would take these drugs! Or, since so many people are killed by drunk drivers, they could make driving under the influence illegal, and then nobody would drive after they've drank!

The problem isn't with the legitimate gun owner, but rather the criminal. Brilliant huh? Well somebody should tell the liberals this. The criminals can get guns whenever they wanted to under gun control. With billions of dollars worth of drugs and other goods smuggled into this country every year don't you think handguns would find their way onto the streets? Guns can also be made with ease, a teenager can make one in a shop class.

The problems of crime could be solved if all the current laws were enforced. If first degree murderers were executed instead of given three years free mental examination at a hospital it would start them thinking. Maximum sentences would make them ponder the punishments involved. Too many criminals realize that crime does pay and take advantage of it. I mean hang 'em for the felonies!

In your editorial you stated "handguns are made to kill people. That is their sole purpose." This couldn't be further from the truth. Metallic silhouette pistol matches are becoming more popular all the time and hunting with handguns is very popular in many areas.

Face it, most people own handguns for reasons other than to kill others in a criminal fashion. They own handguns for target shooting, hunting and protection. Based on recent statistics, I've computed that out of those 55 million handguns, less than 1/2 of one percent have been used for crime. Why should I have to pay that small percentage?

Rob Parker

P.S. I will give up my gun when they pry it from my cold, dead fingers.

### The Bible endures

Editor:

Mark Roland, in his letter to the editor (*Mustang Daily*, Jan. 12), has an interesting dedication—to debate Christians relative to their faith.

I am not sure I am interested in "debating" the comparative values of faith vs. fact (so-called). Faith provides me peace, love, joy, and happiness (even knowledge of sins forgiven in Christ Jesus, and eternal life). Fact would seem to only provide wars, hate, violence, sadness, death without hope, and judgment. Doesn't seem to be a great step upward.

Voltaire agreed with Roland and con-

cluded, 200 or so years ago, that the Bible would be extinct within a generation after his death. He died. The Bible did not. Today his home (I understand) is one of the major Bible distribution centers of France.

Men rise up, argue with God and the Bible, and do nothing else (other than destroy the faith of a few, substituting nothing in place of it), then die like animals, and are generally forgotten. Our God goes on!

Paul Kenyon,  
MA, JD.

Associate Professor (of Business Law)

### Unnecessary towers

Editor:

I, for one, don't want to pay \$200 to \$300 million for PG & E to install cooling towers at Diablo Canyon. There have been too many delays, studies and re-studies already. Even the Regional Quality Control Board staff thinks that PG & E's proposed releases would have

no ill effects on marine life. What more do they want?

I would much rather see PG & E release warm water with no significant ill effects than have them spend an outrageous sum to build unsightly cooling towers they don't need.

Carol Higgins
